PROJECTS**E-Commerce Price Comparison Platform | [Link](#)**

April, 2025

- **Problem:** Shoppers waste time comparing prices across multiple sites, leading to decision fatigue.
- **Solution:** Users can view prices from multiple websites on one page, making shopping faster and simplifying comparisons.
- **Result:** Less time spent comparing prices, faster shopping, and an increase in user satisfaction.
- **Technologies Used:** Spring Boot, REST APIs, MySQL, ORM Framework, Maven, Core Java.

ATM Transaction Reliability Improvement | [Link](#)

Oct, 2024

- **Problem:** ATM systems let users start transactions without checking network status, leading to more failures during weak connections, especially at peak hours.
 - **Solution:** Developed a system to check network quality before starting ATM transactions.
 - **Result:** Reduced system failures, increased the reliability of peak-time transactions, and improved the overall user experience by ensuring stable and consistent transaction handling.
 - **Technologies Used:** Java, JDBC, MySQL.
